Forecast for Thursday 06 Jan 2022

Weather: Cloud and outbreaks of snow will soon spread from the west this morning. Becoming drier from early afternoon onwards, but snow and hail showers will then spread east for the rest of the day, and turning occasionally heavy by evening. Risk of coastal lightning after dark.

Chance of cloud free mountain/hill tops above 800m: 20%

Visibility: Mainly very good around dawn with small amounts of cloud on the summits. Then low cloud down to 500 metres becoming extensive and lingering for the rest of daylight hours as snow soon arrives from the west. Some cloud breaks possible across Arran for a time in the afternoon but these will be unreliable. Cloud becoming much more broken from the west after dark.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Severe winter time conditions expected today. Blizzard like conditions developing at times with blowing snow and low cloud reducing visibility to near zero. Gusts to 70 mph on the highest tops until afternoon.

Forecast for Friday 07 Jan 2022

Weather: A bright and very cold day with occasional snow showers, these will be frequent and heavy in the morning. Becoming drier through the afternoon and evening as a ridge of high pressure builds from the west.

Maximum wind: Westerly gusts 30 to 40 mph on higher tops.

Chance of cloud free mountain/hill tops above 800m: 70%

Visibility: Outside of cloud and showers expect excellent visibility and great air clarity, although snow may be blowing around on the higher tops. Cloud lowering to 700 metres as showers pass by, otherwise many summits mainly clear of cloud

Temperature: **Glens:** Minus 2 rising to 2 Celsius
At 800m: Minus 2 Celsius
Freezing level: 400 metres or less
